

HackensackUMC AirMed1 at Greenwood Lake Airport

Hackensack University Medical Center's AirMed1 has officially become operational as of 7:00am, Thursday April 5th. Their offices will be located in the rear of the main building and will have personnel on hand 24/7 in case of an emergency. This helicopter will offer vital transport services not only to Hackensack UMC patients, but to their affiliate hospitals as well.

AirMed1's helicopter, an EC-135, will be stationed out on the main ramp adjacent to the hangar. **Because of this we ask that no one park their vehicles by the walk through ramp gate.** This is to protect your vehicle from the downwash as well as to make room for emergency vehicles in case of an emergency. Please use the parking spaces near the drive through gate or park near your aircraft.

If you would like to learn more about HackensackUMC and their operation, you can visit www.hackensackumc.org.

2012 Greenwood Lake Air Show, WWII Showcase & Car Show

The annual Greenwood Lake Air Show will be back **August 18th & 19th, 2012**. The date is quickly approaching and things are quickly shaping up. We already have a pretty good line up pieced together but we're still looking to add on a few more acts.

This year we will also have a **Car Show** much like we did during the October Air Show. We will still have all the WWII guests and display planes that everyone loves but this will add yet another aspect to our growing show.

As always, we could not put on such a great show without a tremendous group of volunteers. **Volunteers are still needed for this year's show.** If you would like to volunteer for the show, or for more information, you can visit www.greenwoodlakeairshow.com. You may also fill out the volunteer form bellow and drop it off at the airport office.

Air Show Volunteer Form

Full Name: _____ E-Mail Address: _____

Cell Phone: _____ Home Phone: _____

Positions of Interest: (Please circle all that apply)

Admissions

Parking

Vendor Assistance

Program/Merch. Sales

Front Line Attendant

Refuse Collection

Set-up/Tear-Down

Car Show Attendant

No Preference

Qualifications: _____

Dates & Times Available: _____

- Volunteers must be able to attend a Volunteer Orientation Session held during the week prior to the event.
- Volunteers must be willing to work a minimum of one day.
- Volunteers must be neat & clean in appearance.
- Volunteers must arrive on time for shifts.
- Greenwood Lake Air Show will make every effort to place you in the area you have noted but reserves the right to place volunteers in areas most needing of staff.
- Volunteers may not leave shifts early.
- Greenwood Lake Air Show reserves the right to refuse a volunteer for any reason.
- **By submitting above form Volunteer agrees to hold harmless Greenwood Lake Airport Air Show, it's employees, and affiliates from any loss, damage, liability, claims, cost and expense, including legal fees which may be incurred for by reason of my volunteer participation in the Greenwood Lake Air Show. Volunteer also agrees to abide by the Volunteer Expectations as written above.**

New Drive-Through Gate

Some of you may have already notice the improvements to the back gate. To better heighten security, the gate has been equipped with **new sensors and mechanics** to tell when vehicles are passing through the gate. This is also a safety feature as the gate will not attempt to close if you do not travel through the gate fast enough as it would have on the old timed-opening system.

In the coming month the keypad will also be swapped out for a **card scanner**. Each tenant will be issued a card that will be used to open the gate. This is a more efficient system as it prevents the need for a code database and also prevents the misuse of the keypad codes. When this scanner arrives, an e-mail will be sent out to the tenants to come receive their cards at the main office.

Fuel Price Remedies

With fuel prices on the rise, every little savings counts. **By getting a Greenwood Lake Airport Pre-Paid Card, you can save 15¢ per gallon at the self-serve pump.**

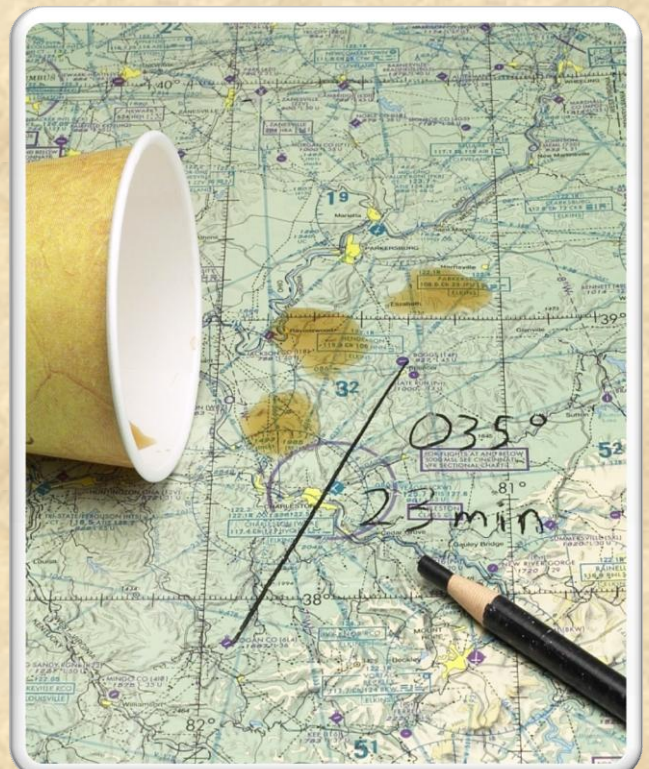

For those of you who are unfamiliar with the program, all you need to do is come into the airport office and open a prepaid fuel account. After an initial deposit, your money is loaded onto a fuel card that can be used at the self serve terminal. This card enables a 15¢ discount off the self serve price. When your account balance runs low, you may replenish your account at the front desk.

Another possible solution to the rising fuel prices is **the Phillips 66 WingPoints Rewards Card and Phillips 66 Credit Card**. With the WingPoints Rewards Card, each gallon of fuel equals rewards points that can be redeemed for prizes or even fuel discounts. When you use your Wingpoints Rewards Card in conjunction with a Phillips 66 Credit Card, you earn double the amount of points! To apply or learn more about these programs, you can visit www.flyphillips66.com. You can also stop by the office to pick up a **FREE WingPoints Rewards Card** that you can start using immediately!

New DuraCharts Sectionals

SkyTraining at Greenwood Lake Airport now carries DuraCharts Products! DuraCharts products are up to date, FAA approved, durable sectional aeronautical charts for discerning pilots who demand the best at a reasonable cost. These charts are virtually **tear resistant** and are manufactured to last. There will be no more tearing from the constant folding and unfolding of the charts. The details are also **printed more sharply and brighter** than on a standard chart. Better yet, DuraCharts are also **water resistant!** No more ruined charts from spilled coffee.

DuraCharts, AFDs, TAC and IFR charts, along with other pilot supplies, are all sold at the front desk. If you would like to learn more about these amazing charts, you can visit www.duracharts.com.

Maintenance Services

It's that time of year again with perfect flying weather right around the corner. Make sure your plane is ready for the task and up to date with the latest A.Ds and inspections. Even if you just need a simple tire or oil change, Wagner Aircraft Maintenance is available for service. We also offer battery services to **replenish your battery** after the cold winter.

You also want to make sure your aircraft looks the best and is protected from the summer sun. Wagner aircraft offers a full range of **aircraft cleaning** from a simple wash to **full detailing** jobs.

Before and After Polishing

Acrylic Teflon Polishing will bring out a shine and clean your original paint like a standard rub-on wax can never do. This state of the art polish is applied in two stages to bring out the most of your aircraft's paint and shine. The first step is a **pre-treatment** that removes accumulated wax build-up and other chemicals on the skin of your aircraft. The second stage is a **Teflon based polish** that cleans and shines your original paint. **The shine you see is your actual paint**, unlike a wax that uses a compound to enhance the shine! This fully detailed job, **interior and exterior**, provides protection and shine that lasts.

To get a quote on polishing, or to schedule any other maintenance, call up or stop by.

Jersey Skylands Aerobatic Championship

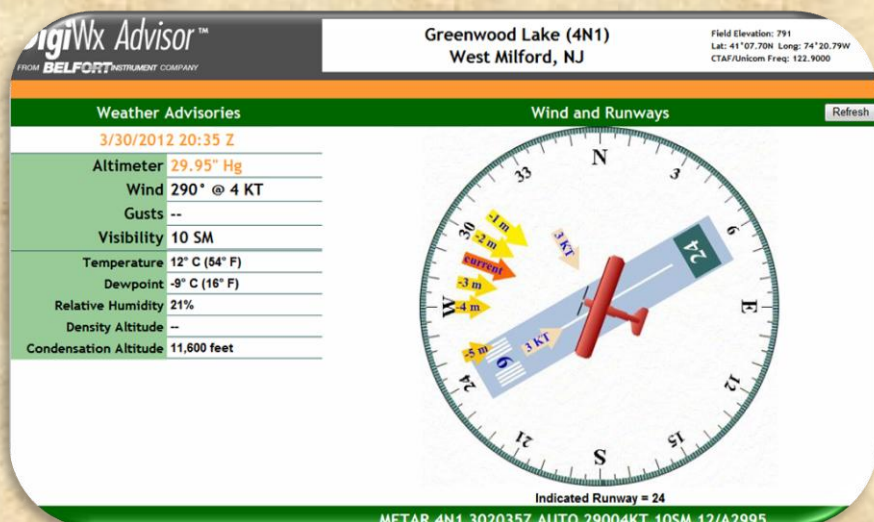

The IAC 52 will be back at Greenwood Lake **May 17th-20th** for their annual aerobatic championship match. Tenants are welcome to come to the airport and sit out and enjoy the festivities. The airport will remain open for anyone who wishes to fly, but please remember to **check your NOTAMs**, as there will be an active aerobatic box over the normal traffic patterns. A copy of the NOTAM will be posted in the lobby once the date gets closer.

Also please be aware when walking or taxiing around the **ramp area as it will be very congested**. If you see you will have a hard time reaching the self-serve pump, please **request service from the fuel truck**.

For more information on IAC 52, you can visit www.IAC52.org.

Mobile AWOS Service

For those of you that don't already know, our **AWOS is accessible online!** The same screen that you see when you walk into our lobby can be brought up from home or on the go on your **mobile smart phone**. Simply open your web browser and type in www.digiwx-4n1.com. You get a display that will tell you the active runway, wind direction (the yellow arrows show trends), altimeter, visibility and more.

When flying the AWOS is accessible by clicking your mic three times.
